DETAILED ACTION

The following action is in response to the amendment filed for application 09/945,543 on February 12, 2004.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Alfred Mangels on February 25, 2004.

The application has been amended as follows:

In Claim 14:

on line 1, after "claim", --1-- has been inserted.

Allowable Subject Matter

Claims 1, 3-47 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to show or render obvious the method for controlling at least one drive train component of a motor vehicle as claimed, and particularly including maintaining below a predetermined difference limit a difference between an actual engine rotation speed gradient and a predetermined output side drive train rotational speed gradient by regulating the engine rotational speed gradient at a transition between a startup phase and a drive phase of the vehicle, including the remaining structure and controls of claims 1, and 3-9, respectively.

Art Unit: 3681

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
